Specification

**Description:** Garden24 is our garden and outdoor lighting system that can be installed and moved easily to suit your needs and taste. The system is based on a transformer which converts mains voltage to 24 volts. Transformers are available as 36 and 60 W units, meaning that this wattage is their maximum load.

**We recommend:** For best results use a maximum of 90% of the transformer's output.

**Technical:** The transformers are IP44 rated for outdoor use and have a 2 metre electrical plug in cable.
